

Allsteel's Sustainability Goals for the Future

Planet

- Reduce landfill disposal annually by 50% by eliminating waste at the source and diverting waste into established recycling streams.
- Achieve 100% diversion of waste from fabrication and assembly processes.
- Design and develop all new products using Design for the Environment principles with complete Life Cycle Assessments.
- Reduce facilities' annual energy usage by 10%.
- Reduce direct impact to greenhouse gas emissions annually by 10%.
- Develop renewable energy options for facilities to replace or offset 20% of our energy usage.

People and Profit

- Expand our members' current involvement in projects that strengthen our communities and make them a better place to live.
