

ALLSTEEL RECEIVES TOP RECOGNITION FOR WORKPLACE PRODUCTIVITY

“Buildings” Magazine Recognizes Allsteel’s Relate™ Seating

Chicago, IL – *June, 2006* – Allsteel’s Relate™ seating collection was named a grand prize winner in the “Workplace Productivity Solutions” category at the annual Innovations Awards by *Buildings* magazine at NeoCon 2006.

The new Relate collection, with its comfortable, intuitive ergonomic features, offers performance and aesthetics for every office need – from task chairs and stools to conference seating and guest chairs – by integrating several new proprietary technologies.

“The primary breakthrough of Relate is its Body Adaptive Control™ system,” said Tom Niergarth, Allsteel Vice President, Seating. “This integrates the two most important ergonomic features of the chair. The result delivers a remarkably comfortable and responsive seating experience.”

“We are proud to be recognized by *Buildings* magazine with its Innovations Award for our new Relate collection,” he continued.

This marks the third straight year the company has been recognized in this forum. In 2004, Allsteel’s Sum™ chair won the grand prize in the Productivity category, and in 2005 Allsteel’s Reach™ integrated storage system took home two Innovations Awards, including the grand prize in the “Workplace Flexibility Solutions” category and a “Citation of Excellence” for its Reach integrated storage system.
