## Seating

PRICE LIST 2010  
prices effective August 29

Seek™

*Seek is a multi-purpose chair designed for today's ever-changing corporate environments that require durability, versatility, and beauty. Its light-weight mobile design is ideal for multi-purpose settings such as adjunct teaming areas, conference rooms, classrooms, training rooms, and cafés.*

*The idea has always been to provide seating that one can sit in...not on. Seek achieves this with a deceptively simple design that conforms to the shape and movement of each user's body. Its pivoting back allows for natural shifts in posture while intuitively distributing lumbar support. The contoured seat reduces pressure points and evenly distributes weight for long-term comfort. So sit back, relax and let Seek do all the work.*

## MODELS AND OPTIONS

With Seek, extended periods of sitting are refreshingly comfortable. Designed to move with the body and minimize pressure points, Seek conforms to each user's body movement, so no matter how they sit — or how long they stay — they stay comfortable.

**Weight-assisted pivot back** technology intuitively provides balance and lumbar support for ergonomic recline.

**Contoured seat design** distributes weight evenly, stabilizing the sitting bones during forward and reclined comfort. Universal fitting, Seek comfortably accommodates 95% of users.

**Arm and Armless** models available. The curved shape of the arms accommodates differences in elbow height. The downward curve helps when approaching worksurfaces.

**Casters or glides** are available. Glide options include nylon, nickel-plated, or felt. The versatile multi-surface casters are designed for use on hard or soft surfaces.

**Seek offers the ability to stack, to nest, and to nest the stacks** for optimum space efficiency. The seat folds up so multiple chairs nest together like grocery carts. Four nested chairs can move or store together in a discrete 37-inches of space. Each additional nested chair adds 5½" of depth. Multiple chairs can stack up to four high in a space of 53"H x 28"W x 22"D. Each additional stack of nested chairs adds 15" of depth.

A Seek stack height of 4 chairs is recommended for storage density that allows the stacks to nest together. A maximum stack height of 6 chairs should not be exceeded when transporting the stacks of chairs. For maximum stationary storage density, Seek may be stacked up to 8 high.

**Chairs ship two per carton to minimize waste.** Model numbers and prices are per chair.

K-PPCA

## CONSTRUCTION

The solid construction meets or exceeds industry standards for performance. Seek's flexible molded-polymer backrest facilitates heat-reducing airflow. Optional mesh back lets light and air through for added comfort.

Seek's polymer shells are made from 100% recyclable color-matched polymers with UV resistance to preserve colorfastness and ensure long-term durability. Allsteel paint finishes (for frames) are formulated for optimum hardness and chip resistance.

Seek meets the requirements set forth in ANSI/BIFMA X5.1-2002 and BIFMA G1-2002. Seek is warranted for multiple shifts and users up to 300 lbs. Its lightweight construction makes it easy to move.

## OPTIONS — SEEK:

### *Backrest Style:*

- M** Mesh Back (Dusk Mesh only)
- P** Polymer Back

### *Seat Style:*

- U** Upholstered Seat
- P** Polymer Seat

### *Casters/Glides:*

- C** Caster
- G** Glides

### *Armrests:*

- O** Arm Chair
- A** Armless

### *Frame Finish:*

- B** Black
- S** Silver

### *Polymer Color:*
