## Hawaii Bank Finds Paradise with Reach™

Hawaii is a true paradise, but finding space to do business can be anything but relaxing in one of the most expensive real estate markets in the country. With Reach, a local banking institution found a solution they could bank on for space and cost savings for years to come.

**Reasons for Success** When they were preparing to move into a new space, they faced two major challenges: find a solution that makes the most out of every inch of space in their Honolulu offices and find a way to solve employee's desktop clutter.

With pedestals and lateral files under most of the worksurface area in the bank's old 8'x8' offices, they could not make efficient use of their office space. *"They had piles of paperwork in stacks and everything from the telephone, CPU office supplies and personal items sitting on the worksurface above the pedestals and files,"* said the Allsteel dealer.

Allsteel's New Extensions™ accessories now allow many of the items that once sat on the work surface to move up, taking advantage of the vertical space. Because Reach's storage is built into the wall instead of under the worksurface, the employees now have space to actually pull up their chairs anywhere along the space to work. And by combining Reach

with Terrace 2.6, there is more privacy where it was needed with acoustical and glazed tiles.

Even more important was the space savings Reach created for them throughout their entire floor plan. A condensed footprint now allows for the future growth of nine additional workstations when compared to traditional workstations systems.

*"We also were able to create a collaborative area using round Allsteel tables, and a Reach secondary worksurface that serves as their telephone table,"* said the dealer. *"In addition, we provided work space for two file room and one mail room employees who used to spend their day either within a windowless file room or a little mail room."*

Reach creates offices that are easier to get organized. It also lets you store things more neatly, think thoughts more clearly, and stretch yourself more fully. All of which lets you accomplish more, more effectively.
