Designed by Marcus Koepke.

#19 began with you: how you sit, move, work, adjust, and recline. The chair's purpose is your purpose. It moves naturally with you, keeps you supported in every position, and makes you comfortable throughout the day.

You shaped its design.

Numerous technologies make #19 a singular innovation. The seat and back are designed to keep your body at a comfortable temperature for extended work. Its self-balancing motion allows you to move effortlessly while keeping a healthy posture.

You work together.

Seating upholstery: **Tria Solid Jute**
Frame finish: **Aluma**

Every part of #19 was custom designed, down to the casters. The result is a beautiful work tool.

Just look.

#19 incorporates the most advanced ergonomic information and technology to date. It's more than an incremental improvement in seating—it advances seating technology. 18 integral parts are only the beginning. It needs you.

You activate its potential.

Structure without stiffness. [18]
Flexible Back Carrier

The non-mesh miracle. [16]
VenTech Thermal Weave

Best feature backward. [9]
Avatar Vertical Aluminum
Back Supports

It's got your back. [17]
Plexus Lumbar System

Easy arm's reach. [15]
Adjustable Armrests

Fashion-forward fabric. [13]
Tria Compliant Seat Upholstery

Three layers of cool. [12]
Tria Calibrated Seat System

A truly moving experience. [8]
Avatar Back Pivot Structure

Support for your support. [11]
Seat Contour Panel

Just limit and lean. [5]
Tilt Limiting Lever

Moving behind. [4]
Seat Depth Adjustment

Posterior position. [7]
Avatar Aluminum Seat Structure

An armrest's best friend. [14]
Aluminum Arm Supports

The previously missing link. [10]
Avatar Synchronizing Link

Framed for comfort. [6]
Avatar Aluminum Chassis

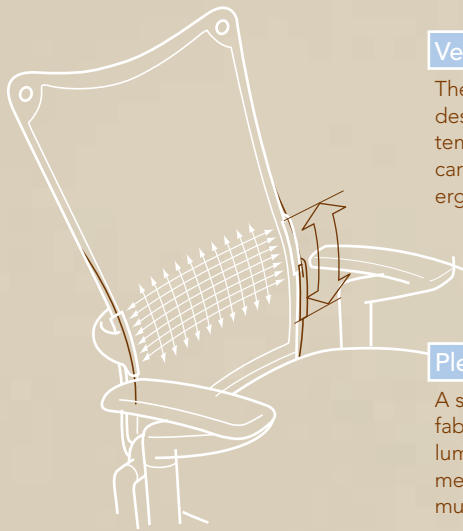

So quiet, so smooth. [3]
Pneumatic Height Adjustment

Beauty in stability. [2]
Aluminum Five-Star Base

Floor friendly. [1]
Multi-Surface Casters

#19 is more than ergonomic. It regulates temperature, enhances circulation, eliminates muscle tension, and distributes pressure evenly.

This is ergonomics redefined.

VenTech

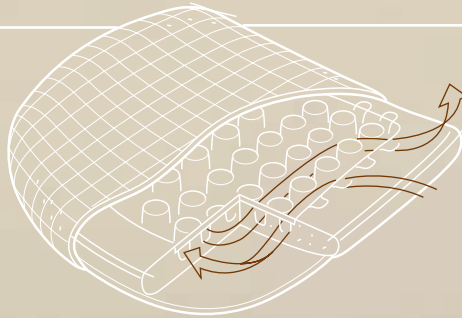

The back material is a specially designed weave that regulates temperature. Framed by a pliable carrier, it provides contoured, ergonomic back support.

Plexus

A sliding component increases fabric tension and firmness for lumbar support. The wide adjustment range accommodates multiple body types.

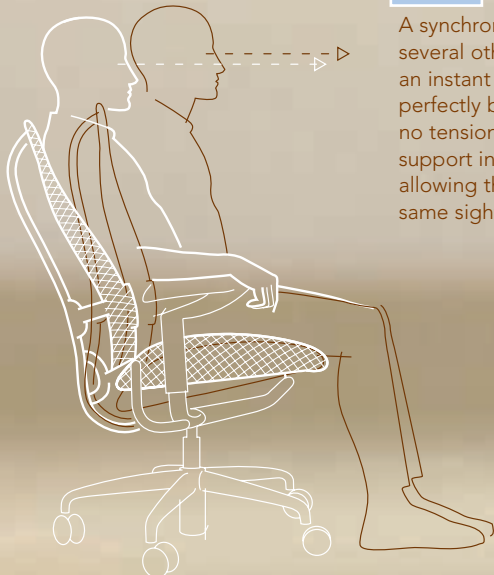

Tria

Foam, Technogel®, and Tria compliant upholstery create a breathable seat that distributes pressure evenly and minimizes shear stress. Air is allowed to circulate, which regulates temperature.

Avatar

A synchronizing link, along with several other components, creates an instant center of motion. The perfectly balanced recline needs no tension adjustment and can support infinite tilt angles, while allowing the user to keep the same sight line.

Your entire back receives even, flexible support in every position and stays at a comfortable temperature while you're seated.

Your lower back is supported exactly where you need it to be. Adjustments can be made easily while seated. You benefit from smooth, unobtrusive comfort.

Your body temperature is regulated so you can work comfortably for extended periods. Technogel and foam reduce the pull of the seat and distribute your body weight for even support.

As you go from sitting upright to a reclined position, your posture and line of sight are maintained. The rise of the seat maximizes the back-to-seat ratio, expanding your torso for better circulation. The self-balancing motion allows a smooth "ride," prevents muscle strain as you recline, and ensures the back never leaves you.

#19 is made from 100% recycled aluminum. 88% of the materials that go into it are recyclable.

As new features are developed, the chair can be easily upgraded, minimizing manufacturing's demand on the environment. Every part is fully covered by the #19 Lifetime Warranty. That means #19 will fulfill its design function as long as your workplace needs it.

It's designed for life.

Seating upholstery: Tria Solid Xanadu
Frame finish: Charblack Metallic

Nothing has been added to #19 for appearance alone. Purposeful Design® is the result. Function is intuitive and apparent; it depends on interaction with you.

You fulfill its purpose.

I don't know where I end and the chair begins.

Tolleson Side.

The perfect guest chair to complement #19 is Tolleson Side in Aluma or Charblack Metallic with Tria Solid seating upholstery. Choose from a variety of back shapes. Include arms or forget them. It's casually elegant and a pleasure to sit in.

Respecting the environment.

At Allsteel, we help our business partners achieve a positive environmental impact and understand that environmental consciousness can be gainful. This means ensuring that all materials balance performance and sustainability. Strong, high-quality products guarantee years of use and re-manufacturability.
