

# Introducing Merge™ Table Collection

Where people and projects  
come together

Winner of the Best of NeoCon® 2006 award, Merge is a comprehensive collection of tables that meets the needs of today's office. The collection offers three advanced function tables that truly adapt to the way workers work. These advanced function tables offer the mobility, storage, and height adjustability required by workstation, teaming, and conferencing applications.

## Conference Tables with Power Bay™

Merge conference tables have a hidden Power Bay with tops that easily slide open and closed, storing and providing immediate access to the most common collaboration technology tools.

*The Power Bay has a 3/4" opening when the top is closed that allows equipment to stay connected and cords concealed.*

## Merge Adaptive Tables

Merge adaptive tables convert any space (private office, workstation, etc.) into a meeting space by quickly and easily changing from stowed, to docked, to free-standing.

*The 36" table (round or square) can drop a leaf, and effortlessly rise and literally "dock" level with most other tables or desks, making any area ready for an impromptu meeting or additional workspace.*

## Merge Lift & Release™ Height Adjustable

Merge Lift & Release tables are a fast, easy, and cost-effective way to support requirements for user-controlled height adjustability from sit to stand thanks to a simple trigger latch.

*The gravity-driven Lift & Release mechanism adjusts individual legs instantly and easily from a standing position.*
