

## **ALLSTEEL'S ADEPT™ – A SIMPLER WAY TO DIVIDE SPACE**

### ***New Adept Provides Greater Flexibility and Functionality to Easily Expand or Reconfigure Allsteel Panel Systems***

Muscatine, Iowa – *June 2007* – Allsteel launches Adept™, a new collection of cross-platform return and wing-wall dividers, desking, storage and supports that seamlessly work with each of Allsteel's systems platforms and Reach™ integrated storage, by offering simpler, lighter-scaled options for open-plan workstations.

Adept connects to Allsteel spine wall panels, expanding the possibilities of the host panel system and creating a more flexible and cost-efficient way to support today's offices. Adept components simplify specification, installation, reconfiguration and inventory management.

Adept's dividers and desking components provide design options for configuring panel-connected or worksurface-connected individual and teaming workstations that are light-scale in appearance, yet surprisingly strong, uncomplicated and easy to install. Its off-modular desking option also allows workstations to be resized without disrupting the main spine. Additionally, U-shaped workstations can now be created in

a smaller footprint. Adept also offers storage options, including a consolidated storage tower (full- and mid-height), as well as desking with beneath-worksurface 'cubby' storage options.

“The name ‘Adept’ speaks to the versatility, adaptability and functionality of this product, especially its ability to allow customers to do more with their existing Allsteel panel system and extend the life of their initial furniture investment,” said Mark Roumfort, Allsteel Vice President, Systems and Storage. “Adept components work effectively and efficiently to provide new ways to interpret and configure the workplace environment. Adept can create individual or teaming workstations that are simple, light and clean, as well as complement, rather than compete, with their environment.”

**ALLSTEEL'S ADEPT™ - A SIMPLER WAY TO DIVIDE SPACE  
ADD ONE**

Adept offers design flexibility, allowing designers to specify the height of visual privacy above and below the worksurface and apply an extensive array of material/detailing options. Facility managers appreciate Adept's fewer parts and pieces including non-handed and reversible components, and full-width dividers that are easy to specify, simplifying inventory management. Adept also features quick connection points to provide faster installation and reconfiguration as needed.
